

2021/22
WOOD INSPIRED
COLLECTION

Inspired by the elements of natural wood...

Today's consumers are exploring floor and wall options that inspire one-of-a-kind designs. On-trend herringbone patterns and large format planks are increasingly popular in both residential and commercial spaces.

A growing trend with staying power, wood-look tile takes form in porcelain and ceramic with highly realistic designs achieved through high-definition printing techniques.

High-Moisture Spaces - In environments where true wood cannot perform, such as kitchens and baths exposed to moisture, wood-look tile provides both a beautiful and practical application at once.

Wall Applications - Consider carrying wood-look planks from the floor to the wall, or simply as an accent wall, installed either vertically or horizontally.

Outdoor Living Spaces - Covered patios with porcelain tiles emulate the wood look, without the risk of natural elements damaging true wood.

Range of Colors - From traditional wood coloration to distinct trending tones with bold color variations, expect to see colors at each end of the color spectrum.
